CONSUMER VOICE · RESOLUTION · TRUST

India's public record for consumer resolutions —
and the case-management system SMEs can trust.

Investor & Partnership Pitch · 2026

THE PROBLEM

Complaints go out. Resolutions never come back.

Fragmented

Reviews, complaints & grievances scattered across silos.

No proof

Brands self-declare “resolved” with nothing to verify it.

Lost queries

SMEs bury customer issues in a shared email inbox.

No track record

Consumers can’t see a brand’s real resolution history.

“I complained. They marked it resolved. Nothing actually changed.”

Google Reviews, NCH and MouthShut all miss the one thing that matters — the affected consumer confirming it’s truly fixed.

One platform. Public reputation + private resolution.

Make it visible. Get it resolved. Verified by you.

HOW IT WORKS

Only the consumer can close the case.

Brands cannot unilaterally mark a complaint resolved.

The full, immutable resolution history stays public forever — that permanence is the trust moat.
